

ABENA Slip FLEXI FIT Premium

Stretchy & snug fit

Try ABENA Slip in a new and stretchy version. Named FLEXI FIT because it follows your body's movement, supporting ABENA's philosophy ensuring their quality of life for the resident. Extra elastics in the waist gives a tight, snug fit that supports all body shapes and provides high protection. Comfortable to wear both day and night. The moderate to heavy incontinence products are specially recommended to disabled people (physical and mentally), restless and partly bedridden residents.

Easy application

Experience an easy product application on the residents because of the stretchy sides that ensures an optimum fit.

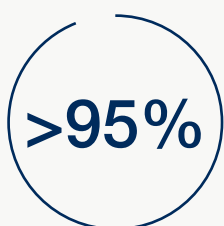

Perfect fit for any body type

Flexible sides and tapes in the waist and elastics in the lower back gives a snug and comfortable fit that adapts to all body shapes and provides high leakage protection; even during movement.

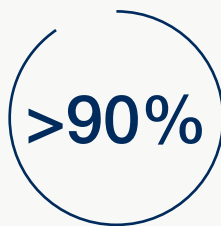

Healthy skin balance

A dry and comfortable surface helps maintain a natural pH balance and prevents skin irritation. A combination of 100% breathability, leakage barriers and high performance core with Top-Dry supports the prevision of IAD (Incontinence Associated Dermatitis).

Our users are certain!

confirm easy application and optimum fit.*

experience a highly adjustable product; even during movement.*

experience no skin irritation.*

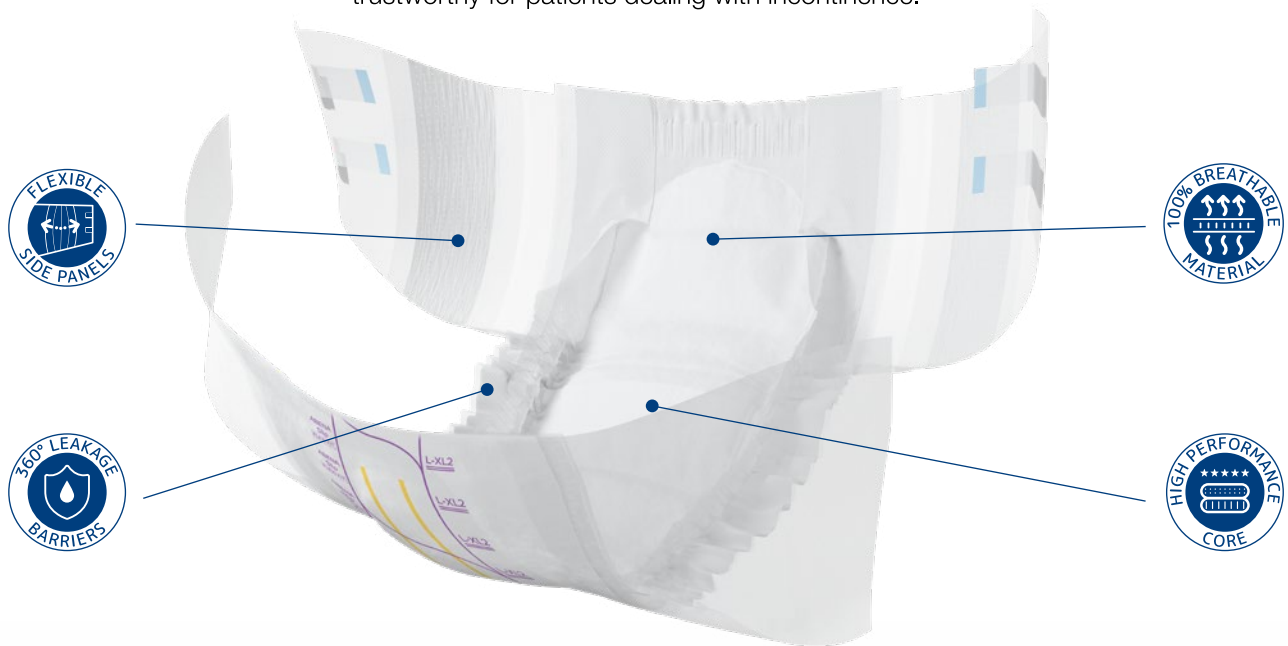

* Tests conducted in four European countries with more than 3,500 products. The test is compliance with ISO 15621 and ISO 16021

The Benefits of ABENA Slip Flexi Fit

ABENA Slip FLEXI FIT ensures the same high quality incontinence product as ABENA Slip. We have just added some improved features to make this product even more comfortable and trustworthy for patients dealing with incontinence.

Secure fit - stays in position

Ensures a secure, comfortable fit for the user. The elastic innovative stretch in the product ensures a secure fit, and a product that stays in place during daily activities. The stretchable product also adapts to different body shapes giving the user peace of mind regarding leakage worries.

Easy application

Due to the flexible elastics in the side panels, at the rear and tapes the brief is easy to apply. Takes up less physical strength for the caregivers (in the wrists and arms) to apply and thus minimizing excessive strain during application.

Extra leakage protection

Provide extra security for the user. The body curved double elastics with high leakage barriers helps keeping the urine inside the product. The breathable, water-repelling leakage barriers provides extra good side leakage protection for fast and heavy urination as well as providing a secure snug fit for the user.

Fast absorption and dry surface

The innovative high performance double wrapped core supports fast urination, ensuring rapid absorption into the core – even after multiple voids. This provides a dry surface against the vulnerable skin preventing skin rash (IAD). The superabsorbent polymers inside the core reduces the effect of ammonia odor, giving a feeling of freshness and dignity for the user.

Breathable

The soft textile backside of the product is fully breathable preventing the skin from overheating and maceration to maintain skin integrity.

Flexibility and easy stock handling

High degree of flexibility to support requested user need in size and absorption. Due to double sizing, it reduces the variety of products required in stock resulting in fewer item numbers to manage. This optimizes the storage space.
